Please read the following notice carefully before proceeding to read this Whitepaper document issued by Cral GM RM Association.

This notice applies to all people who read this document. Please note this notice may be altered or updated.

This Whitepaper is for information purposes only. The contents of this Whitepaper are not a financial promotion.

This document provides information and certain statements to potential investors and enable them to decide whether to investigate thoroughly in this opportunity of acquiring 5Energy token, called "5NRG token".

Therefore, none of the contents of this Whitepaper serves as an invitation or inducement to engage in any sort of investment activity or constitute a prospectus or financial service offering document and is not an offer to sell or solicitation of an offer to buy any security, investment products, regulated products or financial instruments in any jurisdiction.

This whitepaper shouldn't it be relied upon concerning any other contract or purchasing decision.

Prospective acquirers of 5NRG tokens should carefully consider and evaluate all risks and uncertainties associated with the cryptocurrencies, Cral GM RM Association and their respective businesses and operation and the 5NRG tokens.

Familiarize yourself with all the information set out in this Whitepaper.

Ensure that you are aware of all of the would be risks prior to obtaining 5NRG tokens.

Abstract

This document provides information regarding the 5Energy project and 5NRG token which empowers the operations of Cral GM RM Association.

The main goal of this project is to promote the 5Energy social mutual network around the world and also boost the value of TRON (TRX) by building decentralized and independent infrastructure that will be used as the foundation of a powerful dApps ecosystem.

5NRG tokens will be integrated in this ecosystem that we're trying to build.

The specifications and the uniqueness of 5NRG grants to the users, considerable advantages over the users that purchases other tokens for their operations around the TRON network.

As a TRON token (TRC20), 5NRG utilizes and inherits all the technological benefits that the TRON Blockchain has obtained so far. In a short time, we hope it will be listed in addition to the Sunswap platform in many more exchanges in the next future.

Furthermore, 5NRG holders will reap the benefits of the tokens not only from using them in the dApps ecosystem, but also by storing them in their wallets, due to its limited circulation supply as it is distributed only as a specific activity reward.

A critical ingredient to the success of 5NRG as both a store of value and an efficient exchange will be widespread adoption.

Introduction

TRON network is evolving rapidly since the day it first started however, there are still opportunities for further enhancements in the ecosystem.

Additionally, the development of dApps has started to grow and applications that are going to push the mass adoption of cryptocurrencies need to be taken to the next level.

CRAL GM RM Association through its ethical and liable program aims to play a crucial role in this ecosystem by promoting TRON Blockchain and creating a better environment for users, making it easier for them to be involved in dApps with real use case by having the convenience of using 5NRG for their activities.

But what does the 5NRG token represent? What is the ideological basis? Below, we will try to explain what drives us to continue in "our direction".

The Ideology

5Energy token ("5NRG", later) was born as a response to FIAT coins, which contrary to what is made to believe, don't represent any real value but take value only by law.

They are coins created out of nothing by lending to make up deposits of money that do not really exist: the lender simply registers a loan (for the amount of the loan) to the beneficiary and at the same time registers in their liabilities a debt (for the amount of the deposit, equal to the loan) of the same beneficiary.

If FIAT currency had a real value, it would not be legally imposed.

With these coins, a minority of the world's population has accumulated and concentrated in itself most of the wealth, leaving the vast majority in poverty.

And so it will be until workers and producers continue to exchange their work and goods for FIAT coins, because it is precisely the workers and producers who accept (indeed, want) the fundamental means (i.e., money) with which they are dominated.

The only alternative to this situation that has lasted for centuries is to replace the FIAT currency, issued by states and banks, with a currency issued on behalf of workers and producers: precisely 5Energy token, the "money of labour".

It is the intention of the issuer to assign a certain amount of tokens in equal parts to all people who required it, on a commitment to lend or to lend in favor of the issuer or who for it, an amount "X" of working hours: therefore, it is as if it represented the future social work necessary to produce the goods and services that will be exchanged with it.

The positive effects of this currency are numerous.

Among others: equal-part allocation triggers a process of equal redistribution of wealth; the emission limit causes the value and therefore the purchasing power of the currency to be retained and thus increased over time; being issued on behalf of workers, frees those who work and produce and also those who cannot do so from the domain of finance; by not accruing interest, it eliminates the possibility of enrichment through money alone.

5NRG token

In 2018, cryptocurrencies began to spread on a global scale. The idea of creating a cryptocurrency that could truly be used for exchange and payments similar to legal tender such as the euro and dollar was born.

Cryptocurrencies had previously been used purely as a tool of speculation, and not thought of as a traditional currency.

Today, people have the opportunity to manage their own money and remove themselves from the control of banking institutions, thanks to blockchain technology. Depending upon their technology, issue and circulation, cryptocurrencies can be totally independent from any centralized authority. This revolutionizes the concept of money. 5NRG token is the money of labour, designed to be used as a tool for the exchange of goods and services within its ecosystem.

Some cryptocurrencies have attracted a following by offering benefits such as anonymity and total control by the owner. On the other hand, the high volatility of prices due to speculation has made it impossible to use cryptocurrencies in daily life. It is impossible to imagine the use of cryptocurrencies as an effective complementary currency when they are characterized by high volatility, where percentage points of their value can be lost in a few hours. The speculative use of cryptocurrencies is not supported by real assets that contribute to the formation of a value independent of market confidence.

To last over time, an underlying asset is a fundamental element.

Over 17000 crypto were available as of July 2022, and this number is still growing. Users choose 5NRG for its advantages over traditional currencies and other crypto.

- 1 - 5NRG boasts an unsurpassed transaction speed and very low commission;
- 2 - There are no physical sending limits; a 5NRG transaction can be processed worldwide in a few second without increased commissions;
- 3 - Cryptocurrencies can be sold for other cryptocurrencies or, if available, for dollars. 5NRG is able to generate hundreds of daily exchanges for products and services, and can be converted in dollars into the exchange SunSwap: a possibility, very appreciated, that creates interest and trust;
- 4 - Managing your funds with 5NRG is extremely secure and respectful of user privacy;
- 5 - 5NRG will tend to increase in value because its induced growth has been tested.

The Value of 5NRG token

A cryptocurrency is a form of money and, therefore, a symbol of value. The value of any cryptocurrency is not set by a control body and it can change over time, based on the transactions that take place in its market.

The value of a cryptocurrency depends on the volume of its sales (the more a cryptocurrency is purchased, the more its value rises, while it decreases when demand is scarce and more units are sold). However, it is reductive; to determine the value of a cryptocurrency, you must take into account the whole economy connected to it - that is, the transaction volumes that occur in its network. The number of transactions that take place between a user and others of the same cryptocurrency network depend on:

- the number of people who own and use the cryptocurrency;
- the number of transactions per user.

If the value of a cryptocurrency depends on both the volume of sales and the volume of transactions between its users, then the key is to make use of a cryptocurrency that is as distributed as possible. When a cryptocurrency becomes a means of exchange between people, its growth can be exponential, as its value relies on the stability of its economy. Since its inception, 5NRG token has aspired to be different, with the aim of being recognized as a currency able to protect its value and grow over time. The 5Energy project, based on the token of the same name, aims to develop an ecosystem in which functions and applications are available that users can use to carry out transactions and payments, and to receive earnings in 5NRG token.

5Energy Ecosystem

5Energy has chosen to create its own ecosystem and support its economy even in some real life sector's. The support of some sectors outside the cryptocurrency market is an extremely positive feature, because it stabilizes 5NRG's token price. Cryptocurrencies' values rise and fall constantly. Depending on the dynamics of the market and the quantity purchased and sold, the price can vary significantly. This is because the value of a cryptocurrency is based, in most cases, solely on its trading. It is impossible to predict the trends that must strongly affect the loss of value - particularly considering the danger of sales of large quantities of units. 5NRG token found the solution by embracing an underlying tangible value. The founders, took some years to analyze the market, looking for a solution, before listing the 5NRG token into a decentralized exchange (DEX), now called *SunSwap* (www.sunswap.com). But now, let's see what these sectors are into 5Energy's ecosystem which, month by month, feed the value of token.

Cultural - Recreative - Training Activity (20%)

Through the [Cral GM RM](#) (non-profit association), a self-financed organization, it will be possible to promote and coordinate cultural, recreational, welfare and training activities for all members.

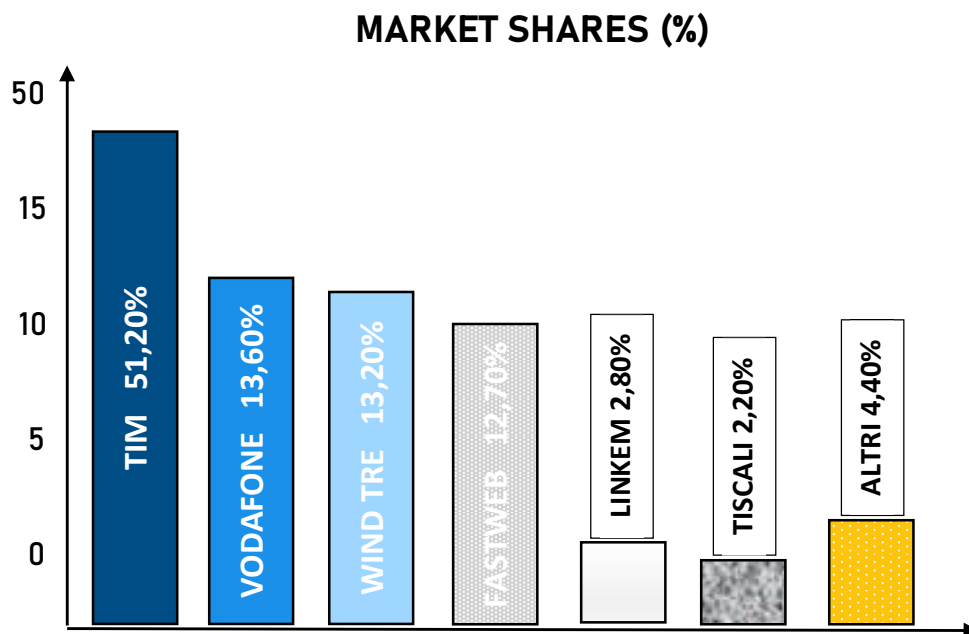

By social card it is possible to take a lot of advantages and it can save money, thanks to the agreements with local entrepreneurs and some partnerships.

Telephone Wholesale (5%)

The telephone wholesale business is the trade in international telephone traffic between companies in different countries, where a company buys wholesale and retail telephone

devices. Thanks to this, the 5NRG user will be able to access telephone traffic services (internet, minutes or messages) at an advantageous price through payment in 5NRG token.

Vouchers (20%)

Our vouchers are special-tickets by which all members (with a valid social card) can receive some benefits, such as buying groceries, fuel-car, personal and home hygiene products. These vouchers can be also spending into restaurants, shopping centers, pizzerias, B&B or hotels. Throughout the Italian territory, these vouchers have a favorable tax treatment, allowing to the same association to redistribute its economic saving. Vouchers are typically in the form of paper tickets but will be gradually being replaced by special payment cards. The real opportunity consists, for each member, in a rewarding marketing program based on payments by vouchers into affiliated stores.

Advertising (5%)

Companies and sellers can buy 5NRG token for advertising their products within 5Energy's ecosystem. Being able to advertise a business that accepts 5NRG token as a means of payment to an audience that already owns 5NRG token is a powerful means of sponsorship to reach its target customers.

Partnership & Venture-Capital (10%)

Thanks to various partnerships, we are to be able buying large amounts of tokens in PRE-ICO of external companies that always work in similar sector, and then resells them on the

market exclusively in 5NRG. This allows 5NRG to buy tokens up to ten times less than the ICO listing price for all 5NRG owners.

Beyond that, 5NRG-users will be free to post their ideas/startups without any restrictions or any control and this will allow entrepreneurs and investors to work together.

Anyone with a good idea will have the opportunity to share it on our platform and other users that notice his idea can become investors or donators to help him turn it into a working project by sending him 5NRG tokens. The best ideas will be supported by our own association both economically and in the administrative organization: the future of crowdfunding and investing will be redefined with 5NRG, as a token kick-starter too. Budget tokens will be used for creating the platform and other features of the project.

Hedge Founds & Staking (10%)

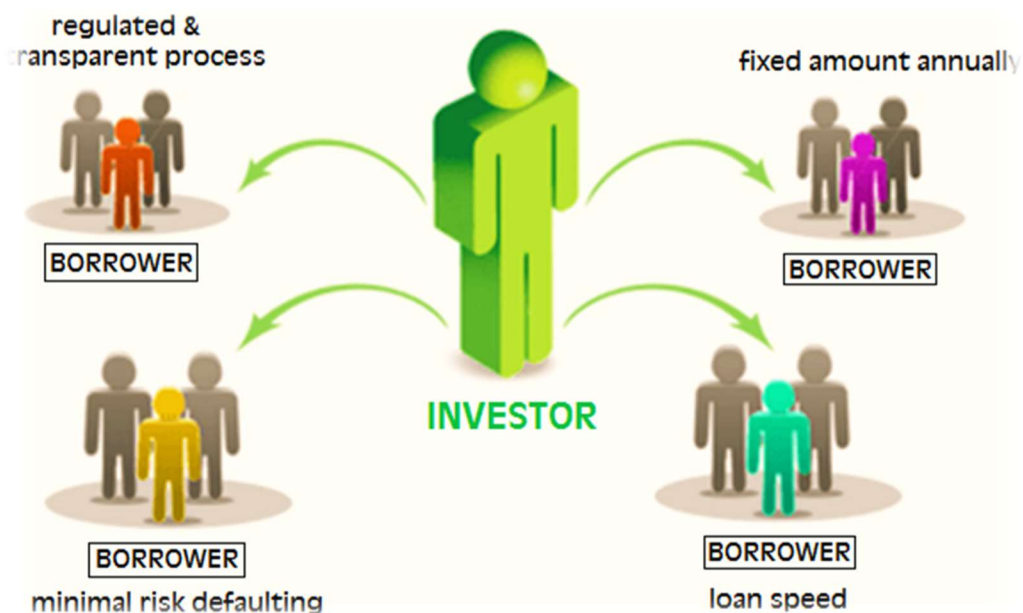

We created, with professional experts in cryptocurrencies, our hedge funds to get the best from our strategies. Testing them, day by day, is very important to make sure you will get monthly profit and not lose any deposits. Anyway, in order to greater security, we always use paper trading to verify our strategy. People using TronLink Pro will can to deposit a minimum amount of 5NRG tokens equal to 50 units while the maximum are 500 units.

We also look with increasing interest at cloud cryptocurrency trading software that will allow us to take advantage of the fluctuations of the crypto market.

But the big new is the possibility of staking. What is staking in crypto? It is the process of locking up crypto holdings in order to obtain rewards or earn interest. Staking crypto can be extremely profitable and it is an excellent way to earn passive income for long-term believers in crypto who are indifferent to price swings. Cryptocurrencies that allow staking use a "consensus mechanism" called *Prof of Stake*, which is the way they ensure that all transactions are verified and secured without a bank or payment processor in the middle. Your cypto, if you choose to stake it, becomes part of that process. A predictable reward schedule rather than a probabilistic chance of receiving a block reward many look favorable to some. And since this is public information, it might incentivize more participants to get involved in staking. For our network, staking rewards are determined as a fixed percentage. These rewards are distributed to validation as a sort of compensation for inflation. People using TronLink Pro will enjoy an APY (annual percentage yield) of 5%, as of October 2022. The minimum amount of 5NRG tokens to stake are 100 units while the maximum are 1.000 units.

Social Lending (10%)

By social lending, is possible of lending money to individuals through online services that match lenders with borrowers. P2P lending companies often offer their services online, and attempt to operate with lower overhead and provide their services more cheaply than traditional financial institutions. As a result, lenders can earn higher returns compared to savings and investment products offered by banks, while borrowers can borrow money at lower interest rates. Remaining the risk of the borrower defaulting on the loans taken out from P2P lending website. This risk, by our formula, is minimized. In fact, the interest rate comes set upstream by our association (either a fixed amount annually or a percentage of the loan amount).

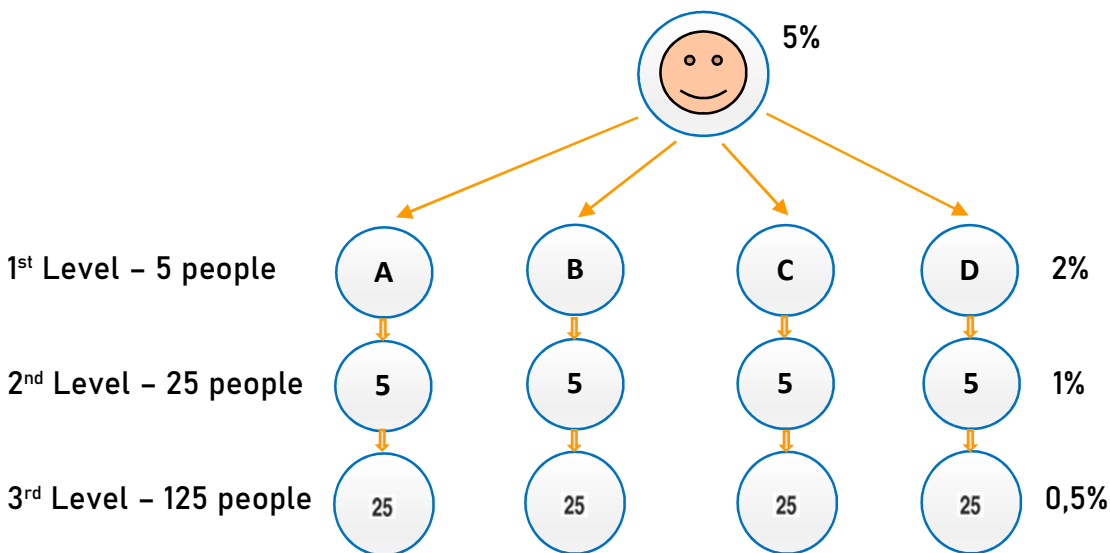

Second-Half Market (5%)

It is an interesting component of 5Energy's ecosystem. Each member can participate individually or enter the sales announcement through the website. The difference from other second-half markets is the economic contribution after sale. In fact, it is 5% (fixed percentage) of net revenue. The probability of sale is very high because the ad is placed within the most important online markets in the country. It is not only a form of shopping but also a choice towards eco-sustainability. In fact, it allows us a) to get rid of what is no longer needed but still in perfect condition and, for this reason, it can still be useful to other people, b) to eliminate the amount of waste, safeguarding the environment, c) to give our own contribute to sharing economy.

Mutual Free Social Network Marketing (15%)

Unlike all other networks, people (over 18 years old) can join for free. It has forbidden to use multiple accounts and KYC procedure is required. The violation of these two rules will result in the termination of all types of relations without any financial return. The path toward success is better known as "to be a builder", includes 3 training courses and intermediate tests. Training is the key to achieving standard quality and efficiency.

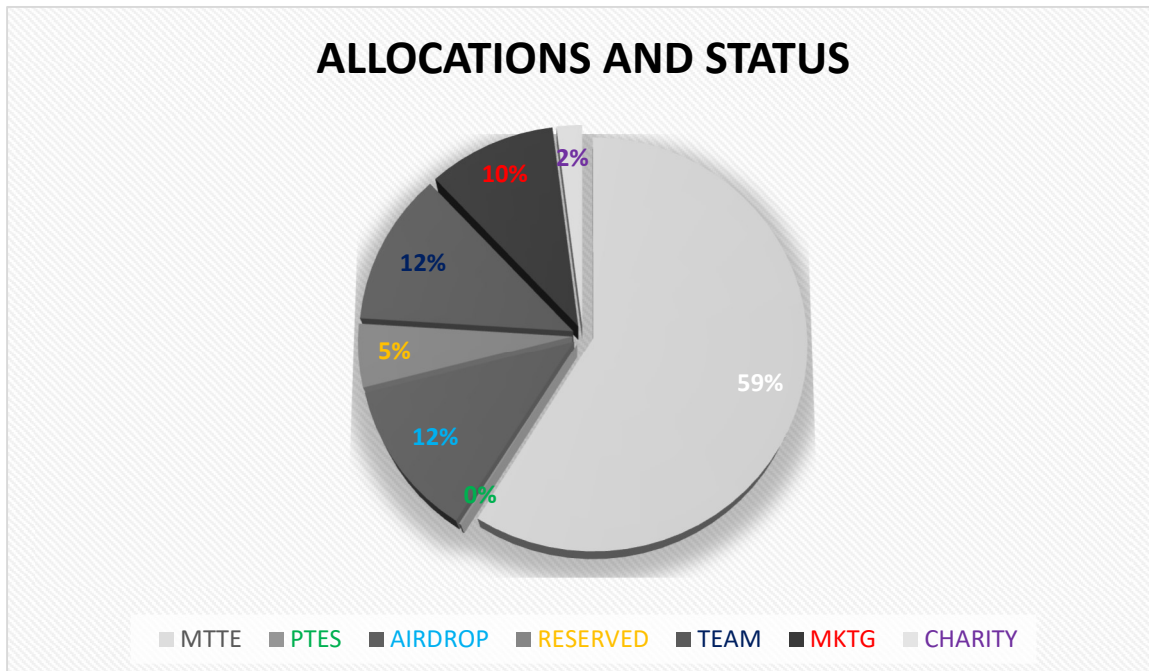

Of course, the profits depend on the level achieved. The profits, commission-free, are monthly processed on each personal wallet. In order to payments, there is the option to choose between different payment methods: PAYPAL, the major cryptocurrencies or - better - 5NRG token.

1. At the beginning people receive a commission of 5% on first deposit;
2. Into 1st downline people receive an additional commission of 2% on the sum of earnings of the same downline;
3. Into 2nd downline people receive an additional commission of 1% on the sum of earnings of the same downline;
4. Into 3rd downline people receive an additional commission of 0,5% on the sum of earnings of the same downline;

5NRG Token: Allocations and Status – Other Info

- 58,84% MTTE (MAIN TOKEN TRADING EVENT – status: open)
- 0,16% PTES (PRELIMINARY TRADING EVENT – status: settled)
- 12% AIRDROP (status: locked until December 31, 2022)
- 5% RESERVED (status: locked until March 31, 2023)
- 12% TEAM (status: settled and ongoing until July 01, 2023)
- 10% MKTG (status: settled)
- 2% CHARITY (status: settled)

Roadmap

 STAGE 1	 STAGE 2	 STAGE 3	 STAGE 4
<ul style="list-style-type: none">- Launching the website- Creating social media profiles- Deploy 5NRG token on Sunswap- Securing liquidity since its issue by tied capital	<ul style="list-style-type: none">- Doxxing the founders to gain trust of users- Hedge Funds- Staking (API 5%)Developing and following a marketing strategy (early 2023)Initial version of the platform (end 2023)	<ul style="list-style-type: none">Built the investment platform (early 2024)Mutual free social network marketing (end 2024)Claiming a listing on CMC (end 2024)Bot-trading (early 2025)Creating sim card branded (end 2025)	<ul style="list-style-type: none">Social lending and venture capital (early 2026)Partnering with large projects (end 2026)Target 5NRG=10 TRX (end 2026)More to come later

Conclusion

5NRG transforms the rules of the system, where we are not only a source of information, but participants who use information to their advantage, with awareness.

Choosing and sharing are the first steps towards freedom.

Today, the blockchain makes it possible to communicate, share and earn with a unique security. The 5NRG earned will be a means of payment, a real currency. The 5Energy ecosystem sharing plan will lead to an ever-increasing acquisition of users, more tokens sold and so 5NRG will strengthen its value and increase the number of applications connected to it. Buying 5NRG now means reserving the opportunity to own a product that, due to its services, will grow exponentially in value and in the world.
